Dear Sir/Madam,

I am writing to express my interest in gaining work experience as an engineer. I am majoring in Civil Engineering Technology and will receive my associate's degree from Mercer County Community College in mid-summer. After graduating, my central goal is to gain the opportunity to work as an intern or part-time alongside professional engineers to further expand my knowledge of engineering. I potentially plan to pursue my bachelor's degree once I gain enough experience as a structural engineer.

Throughout my life so far, I have greatly appreciated what it takes to become a successful engineer and I am inspired by the work engineers have to endure to succeed. I strive to achieve this caliber of success and I feel that I can strongly contribute my most efficient efforts to any company. During my time at Mercer County Community College, I was privileged to represent the ASHE (American Society of Highway Engineers) Student Chapter as president for two years. This has allowed me to develop further leadership experience that I feel can be utilized to help create an organized and diligent work environment for any company.

For nearly three years, I have worked as a produce department clerk and although it is certainly a different field of work compared to engineering, I have gained valuable skills and traits from this experience to contribute to every task necessary. I am eager to work and no task is too difficult. I thrive off of team-oriented work and at the same time, I excel when given any individual task. Regardless of the circumstance, I strive to make any team easy-going and communicate heavily with everybody.

I hope you can consider allowing me the opportunity to discuss potential career offerings you have available. Please email me if you have any questions for me and I will gladly offer any input that you would like to know.

Thank you for your consideration.

Sincerely,
Shane Steinberg
